Hand Valve

Model	Connection Size	Connection Type
	(Inch)	
NHV-04-1/4	1/4"	Flare to Flare, with brass nut
NHV-06-3/8	3/8"	Flare to Flare, with brass nut
NHV-08-1/2	1/2"	Flare to Flare, with brass nut
NHV-10-5/8	5/8"	Flare to Flare, with brass nut
NHV-12-3/4	3/4"	Flare to Flare, with brass nut
NHV-04S-1/4	1/4"	Solder to solder
NHV-06S-3/8	3/8"	Solder to solder
NHV-08S-1/2	1/2"	Solder to solder
NHV-10S-5/8	5/8"	Solder to solder
NHV-12S-3/4	3/4"	Solder to solder

Application:

- Valve bodies are made from forged brass. Its full-size openings for maximum flow and minimum pressure drop, mounting brackets for easy installation.

Feature:

- Forged brass construction.
- Compatible with all refrigerants and oils.
- Available with solder and flare with nuts connections.
- 100% leakage tested.

Application:

- Thermostatic expansion valve regulate the flow of refrigerant liquid into evaporators. They are widely used in air conditioning, refrigeration, heat pump and chiller applications.

Note: if there is "E" after model, it indicates external equalization.

Feature:

- Evap. Temp.: -40 °C to +10 °C.
- Constant superheat adjusting performance.
- Can be supplied with MOP (max. operating pressure).
- Capillary length: 1.5m(NRF/NRFE/RT/RTE); (SM/SME).
- Pressure Equalization: NRFE / RTE / SME: ext. 1/4";
NRF / RT / SM: int.

Our Customers:

Rated capacity is based on:

- Evaporating temperature $t_e = +4.4$ °C.
- Condensing temperature $t_c = +40$ °C.
- Refrigerant liquid temperature ahead of valve $t_l = +37.8$ °C.

Application:

- NEWEX pressure control can protect compressors in refrigeration and air-condition plant, and keep them from over-low pressure or over-high suction pressure; Can start and stop refrigeration compressors and fans of air condensers; Can be used not only in fluoride refrigeration, but also in air and liquid.

Feature:

- Ambient temperature/Medium temperature: -40 °C~65 °C/-40 °C~120 °C.
- Cable connection: The cable entry can be used for 15mm dia.
- Max. working pressure: L.P.: 1 MPa/H.P.: 3 MPa. (R410A: L.P.: 1.2 MPa/H.P.: 4.5 MPa.)
- Max. testing pressure: L.P.: 1.65 MPa/H.P.: 3.3MPa.(R410A: L.P.: 2.5 MPa/H.P.: 4.8 MPa.)
- Standard capillary length is 1m (including flare nuts).
- Product got UL and CE certification.

Notes:

- Our customers include YORK, Carrier, Midea, GREE, Trane, Climaveneta, Dunham-bush.

Application:

- FSF series flow switches are used in measuring and controlling the flow of the liquid in the pipe, such as water, alcohol, etc., as well as in the places where it needs chain effect or cutout protection.

FSF series flow switches have SPDT switch, full-sealing structure as its shell, and stainless steel as its inside components, which can assure its use in any conditions. FSF-A series flow switches are used for caustic fluid liquid, the materials of FSF-A in contact with the medium is stainless steel.

Feature:

- Ambient temperature: -20~50°C.
- Liquid temperature: -25~120°C.
- Max. liquid pressure: 1.5MPa.
- Approvals: DnV, Det norske Veritas(Norway), CQC(China)CE (Europe).

NFL 5/8	5/8"	80	Flare to flare, with brass nut

Application:

- NEWEX sight glass provides accurate and quick visual of refrigerant and moisture levels within a system.

Feature:

- 100% leakage tested.
- Compatible with all refrigerants and oils.
- Solid brass construction.
- Large viewing window and indicator for better visibility.
- Available with extended solder (pure copper) and flare (with brass nuts) connections.

Note:
If the item you are looking for is not listed above, please feel free to contact us for more details.

Application:

- It is used for the high and low pressure protection of some refrigeration systems such as residential, commercial and automobile air-conditioners and ice makers, air compressors, and water heaters. Also be used to pneumatic and hydraulic pressure control systems of all kinds of industrial and agricultural machines.

Feature:

- High pressure SPST open on pressure rise.
- Low pressure SPST open on pressure fall .

Copper Strainer

NEWEX copper strainers are specially designed with oversized screen for protecting, filtering air conditioning or dehumidifying system from dirt and contaminant.

Feature:

- Body shell: Cu-DHP
- Screen: 200 mesh

Private Picture Copyright : WWW.MBSM.PRO

Copper Accumulator

NEWEX accumulator is an important part to compressor. Its main functions are liquid storage, liquid/gas separation, impurity filtering, noise reduction and refrigerant cushion.

Feature:

- Body shell: Cu-DHP
- Dimension: On request

Access Valve

NEWEX access valve are designed to offer convenient access port for refrigeration system, it can be installed in any position on either high or low side for quick testing, pressure checking, purging or charging. All access valves feature 1/4" SAE male flare access ports and are furnished with cap and gasket preventing any leakage. Each cap is machined to have a valve core quick-remover.

Feature:

- Valve body / cap: solid brass
- Extended copper tube: Cu-DHP
- Compatible with all refrigerants

Model	Extended Copper Tube Size	Remark
SDAV-1/8	1/8" Solder	All access valves come with 1/4" SAE male flare, equipped with valve core & brass caps (with core remover). SOMDAS standard thickness and length for copper tube extension is 0.4mm and 100mm. Stable valve cores for replacement are available.

Feature:

- Temperature Range: -70/+250 °C
- Flexible Metal Hose 1: Stainless Steel AISI 316L (EN 1.4404)
- Connection Ring 2: Stainless Steel AISI 304 (EN 1.4301)
- Welded End 3: Copper (Cu-DHP) or Stainless Steel AISI 304 (EN 1.4301)
- External Ring 4: Stainless Steel AISI 304 (EN 1.4301)
- Braiding 5: Stainless Steel AISI 304 (EN 1.4301)

Application:

- NEWEX Vibration Absorber are assembled using annularly corrugated stainless steel hose and high strength stainless steel braiding and copper or stainless steel welding ends. They are designed for optimum performance mainly in refrigeration systems in order to absorb vibration and related damages also to prevent the noise occurs in mechanical piping of various applications.

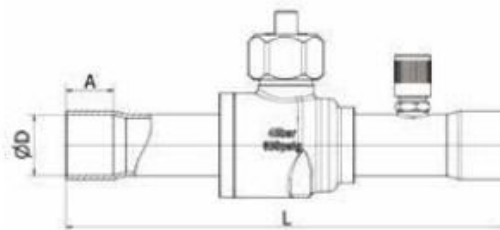

Annularly corrugated metal hoses are selected according to the system pressure, temperature and the direction of the vibration and are used in the connections of the tools that cause a high level of vibration such as:

- Refrigeration Systems
- Air-conditioning units
- Heating pumps
- Pressured systems
- Pumps, motors, machines, compressors

Application:

- NEWEX ball valve is manual stop valve. It has no restriction on flow direction and the operation is more convenient than other stop valves. It can be used in liquid suction and heat supplying lines in freezers and air-conditioner adjusting equipment. This valve can provide the largest flow quantity when it is totally opened and it sealed tightly when it is closed. Furthermore, the application areas of this kind of valve is extensive: -40°C~+150°C. All the valves have the SAE fixed hole, could be installed on panel. "Hermetically" welded construction. One quarter turn from fully open to fully closed valve, Rotation stop for fully open and fully closed valve.

Notes:

- Our customers include Bitzer (Bitzer Condensing unit).

Feature:

- No need to remove cap when open and close the valve and the on-off status could be read directly on the cap.
- Stem locked function to avoid self-close due to vibration in system.
- No pressure drop in flow.
- Only turn 1/4 circle to make valve full open or full close.
- Turning stop for full open or full close.
- Two-direction flow is available.
- Argon arc welded structure.
- Explosion-proof valve stem design.
- Modified PTEE sealing.
- Inside liquid accumulation is avoided.
- Could be mounted on the control panel.
- Applicable refrigerant: CFC, HCFC, HFC, HC.
- Product got UL, CE certification.

NWV-50	3-1/8	3000	105	330	40	1262.5

Application:

- Magnetic check valve was designed with magnet diaphragm, and sealed by the metal. It was used on the exhaust pipe of the compressor. For inside, it uses guide device and automatic suction design that prevents reverse refrigerant flow in liquid lines and compressor discharge lines.

Notes:

- This product is OEM for Danfoss.

Feature:

- Magnet valve seat, tectorial diaphragm. Copper connection size 1/4" through 3-1/8".
- Near zero internal leak rate.
- Compatible with all CFC, HCFC and HFC refrigerants and oils.
- Working temperature range: -40°C~ +130°C.
- Minimum current resistance, large flow rate.
- Small volume, light weight and can be installed in any position.
- Mesh in the valve body, it's not just a check valve, but also a filter.
- Product got UL, CE certification.

NW-V09	5/8"	φ 16	1-1/4" - 12UNF	36

Application:

- NEWEX rotalock valves are installed in the refrigeration system for adjusting the flow rate, opening & closing the flow. Please use silver soldering and make sure the spindle is open and the temperature is lower than 800 °C.

Feature:

- Max. working pressure: 48bar.
- Working temperature range: -40 °C~ +150 °C.
- Compatible with all CFC, HCFC and HFC refrigerants and oils.
- 100% leak testing.
- No asbestos gasket.
- Product got UL certification.

Notes:

- Our customers include Tecumseh and Emerson Climate(Copeland).

Application:

- Solenoid valves are the most frequently used control elements in refrigeration and air-conditioning systems. The valve is controlled by electric current through the solenoid, made from solid brass offering long service life, fast and save switching. Supplied with both NC (normally closed) and NO (normally open) versions.

Feature:

- Wide choice of coils for AC (24V, 36V, 110V, 220V) and DC(12V, 24V).
- Suitable for all fluorinated refrigerants, HFC & HCFC.
- Max. working pressure: 30 bar. (SAE type)
- Max. working pressure: 45 bar.(Solder ODF type)
- Versions with UL and CE approval can be supplied to order.
