The LHT53VBAC is a rotary compressor also used in air conditioners. It is a 32,000 BTU compressor that operates on 220-240 volts and 50 hertz. It is manufactured by Mitsubishi, a Japanese company that is well-known for its high-quality air conditioners and other appliances.

LHT53VBAC rotary compressor

Like the 55R613G T-9ASM, the LHT53VBAC is also a hermetic motor compressor. It uses R22 refrigerant, but Mitsubishi also offers compressors that use R410A refrigerant.

The LHT53VBAC is a more powerful compressor than the 55R613G T-9ASM, and it is therefore better suited for larger air conditioners. It is also a more expensive compressor.

Here is a table that compares the two compressors:

Feature	55R613G T-9ASM	LHT53VBAC
BTU	12,000	32,000
Volts	220	220-240
Hertz	50	50

Refrigerant R22 R22
Manufacturer KTN Mitsubishi
Price Less expensive More expensive
