Category: compressor

written by www.mbsm.pro | 6 April 2024

Characteristics

Basic

Manufacturer Tecumseh

User characteristics

vendor code TY302KS116F045IJD

Brand Tecumseh
Cylinder volume 22.3
Production: Brazil
Mode hbp

Type Sealed piston

Freon R-134A Cooling capacity 2081

Power supply 1 phase / 220-240 V / 50 Hz

Hermetic medium-temperature piston compressor is used for medium-power refrigeration equipment (showcases, cabinets, cabinets, etc.). Designed to work as part of a refrigeration machine with R134a refrigerant. Produced at the TECUMSEH plant. Supplied in individual packaging. Rotalock valve for suction under 1/2 nut.

The main features of Tecumseh TYA compressors:

- lower weight and height compared to similar CAJ compressors,
- a thermal protection relay built into the compressor housing,
- a rotallock valve for the compressor suction with a nut.

Test conditions: ASHRAE: To=-23°C, Tk=+54°C, Tr=+32 °C LBP Suction pipeline, inch: Rotalock suction valve for 1/2 nut.

Discharge pipe, inch: soldering Cylinder volume, cm3: 22.33

Rotalock valve on the discharge pipe: no

Cooling capacity, W: 2081 Power consumption, W: 822

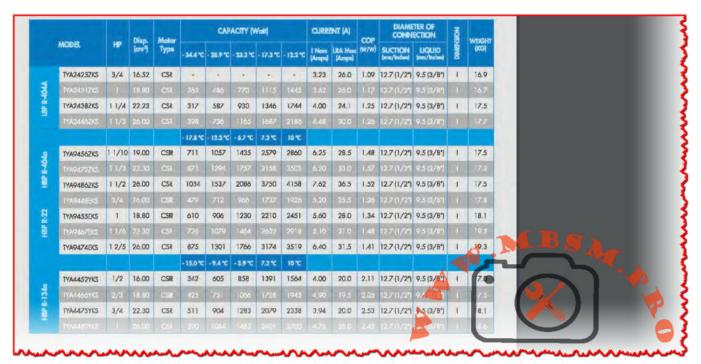

Rotalock valve on the suction pipe: yes Compressor type: hbp, sealed piston CSR

Compressor height, mm: 234.5

Net weight, kg: 19
