Unionaire Super Tech 6-Drawer Inverter No-Frost Deep Freezer – Full English Review

The **Unionaire Super Tech upright deep freezer** with 6 white drawers, inverter

compressor, and steam No-Frost system targets users who want modern design, digital control, and efficient freezing in a compact footprint. With its black glass door and touch digital display, it combines style and performance for households, mini-markets, and premium kitchen projects such as those promoted by Mbsmgroup and its platforms.

Product overview

- Brand: Unionaire, upright deep freezer, around **230-liter** capacity with 6 sliding drawers for organized storage of meat, vegetables, and ready meals.
- Frost system: **No-Frost** with forced air and automatic defrost, often marketed with steam-assisted circulation to reduce ice formation on packages and drawer walls.
- Design: Black cabinet with glass-textured front door, similar to model codes UFN-230LBG1A-DH and UFN-230EBG1A-DH seen on regional e-commerce sites.

Key features and technology

- **Digital touch display** on the front door allows precise temperature setting, fast-freeze mode activation, and status monitoring without opening the door, reducing cold air loss.
- **Inverter-type compressor** (in newer Super Tech/UFN series) modulates speed according to load, improving energy efficiency and maintaining more stable internal temperatures compared with conventional on/off compressors.
- No-Frost steam air-flow distributes cooling evenly across all 6 drawers, limiting frost, minimizing freezer-burn, and keeping textures closer to fresh when food is thawed.

Design, usability, and installation

- The front door’s dark glass finish gives a premium look suitable for open kitchens, showrooms, or commercial corners, matching the aesthetic style seen in the provided photo.
- Vertical layout (approximate dimensions 157 × 60 × 69 cm for 230-L models) makes it easier to place in tight spaces compared with bulky chest freezers, while interior LED lighting improves visibility in every drawer.
- Built-in or recessed handle and adjustable feet help the cabinet sit stable even on slightly uneven tiles, something important in small shops or workshops where Mbsm.pro projects might install such units.

Technical specifications table

The following table summarizes typical specs for a Unionaire 6-drawer No-Frost digital deep freezer in the Super Tech / UFN-230 series (values may vary slightly by sub-model and country):

Specification	Typical value / description
Brand / series	Unionaire Super Tech / UFN-230 No-Frost upright freezer
Type	Vertical free-standing deep freezer, No-Frost digital control
Capacity	Around 230 liters net storage volume
Drawers	6 internal white drawers, transparent fronts on many variants
Door design	Black glass or silver finish, single reversible door depending on model
Control panel	External digital touch display with temperature and mode indicators
Cooling gas	R600a eco-friendly refrigerant in most recent models
Energy class	Typically class A (region-specific), focused on energy-saving operation
Approx. dimensions (H × W × D)	About 157 × 60 × 69 cm for 230-L variants
Country of manufacture	Frequently listed as Made in Egypt for Middle East models

---

Ideal users and applications

- Families who need extra frozen storage without taking too much floor space, especially in apartments or duplex kitchens.
- Small grocery stores, butcher’s shops, pastry businesses, and workshop spaces promoted by Mbsmgroup and mbsmpro.com that require organized, quick-access frozen storage with professional appearance.
- Users looking for low-maintenance equipment; No-Frost technology and digital alarms (door-open / high-temperature) reduce manual defrosting and help protect stored goods during busy operation.
