Brass Male Flare Union Fittings for Refrigeration and HVAC Systems

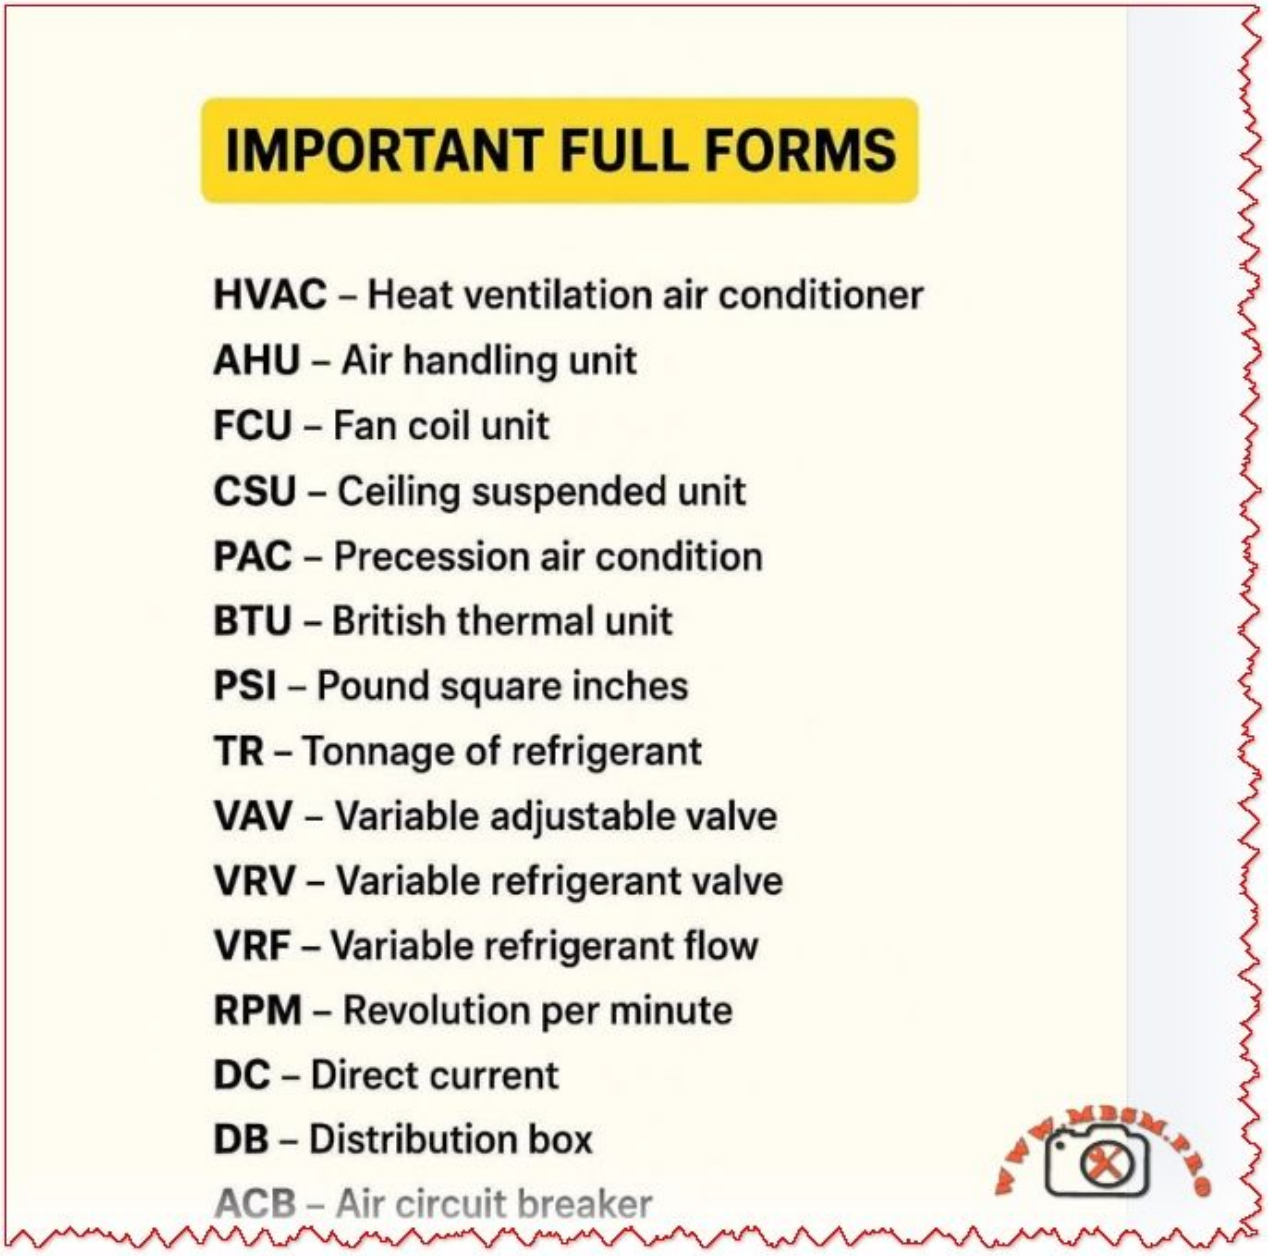

Category: Mbsmpro
written by www.mbsm.pro | 10 January 2026

Brass male flare union fittings are essential components in refrigeration and HVAC systems, providing reliable mechanical connections between flared copper tubes without the need for brazing. These brass flare unions support a wide operating temperature range and are widely used for service connections, line extensions, and removable joints in air-conditioning and refrigeration installations.

Key HVAC full forms
