Mbsm.pro, cheville papillon pour plafond , ou La cheville ou l'ancrage sert à fixer un objet sur une surface

Les ancrages sont beaucoup utilisés en construction, mais on en utilise aussi

régulièrement pour des choses simples comme faire la pose d'un portrait sur un mur.

L'ancrage est beaucoup utilisé pour visser dans un mur de gypse, car celui-ci n'est pas assez rigide pour maintenir un clou ou une vis fermement. Il faut donc utiliser un moyen afin pouvoir visser quelque chose solidement, malgré la fragilité du revêtement de mur.

1. Il peut arriver que les fixations du nouveau chauffe-eau correspondent à celles de l'ancien, mais c'est assez rare.
