www.mbsm.pro, Compresseurs, LBP, MBP, HBP , Difference, and, signification

Category: Solutions,Tester ok
written by Jamila | 9 September 2018

le B correspond à back il faut le traduire en contre pression , en fait sur les compresseurs frigorifiques du fait du circuit fermé , il y a une delta P entre entrée et sortie du compresseur , ce n’est pas comme un compresseur classique d’air comprimé

written by mahdi miled | 9 September 2018

Démarrage immédiat de la pompe à l’ouverture d’un robinet.
Les contrôleurs de pression JETLY de la série PRESSCONTROL, permettent la suppression des dispositifs de commande et de protection manque d’eau de la pompe (électrodes, flotteurs, contacteurs manométrique). En effet, les PRESSCONTROL sont des systèmes hydrauliques et électroniques conçus pour automatiser et protéger contre le manque d’eau les pompes de surfaces et immergées. Ce système gère automatiquement le fonctionnement de la pompe et

l’appareil ne demande ni réglage, ni entretien d’aucune sorte.

www.mbsm.pro , free,For windows, Personal Renamer , Easy filerenaming, Portable Bulk File Renamer, Folder monitor, All in one,

Personal Renamer is being upgraded, and now has an official website Please visit www.personalrenamer.com

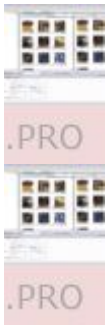

Many have waited for this release, more specifically for the addition of the service monitor which has been added to the program in this release. Personal Renamer has always had the option to monitor a directory and rename files but with this latest addition users can have Personal Renamer monitor a directory invisibly the background, and more importantly while logged out. This is a very powerful and useful addition. Other new features include Undo and the option to apply saved settings when program starts up.

Download Version 2.4.0.0 (Service Beta)

www.mbsm.pro , Quelle est la

différence entre le SDS PLUS et le SDS MAX ?

Category: Technologie
written by mahdi miled | 9 September 2018

Lorsque vous choisissez un outil, vous aurez donc le choix entre la fixation par mandrin classique (avec ou sans clé de serrage) et par mandrin SDS avec les variantes SDS PLUS et SDS MAX.
Attention, vos accessoires classiques ne seront pas adaptés aux système SDS et inversement ! Le système SDS accueille en effet des mèches/forets avec cannelures qui s'encastrent dans le mandrin et permettent une fixation plus fiable que les forets classiques qui finissent par «glisser dans le mandrin», particulièrement lors de gros travaux (forage / percussion sur de la pierre)
