

Highly Rotary Compressor BSA645CV-R1EN

qishanrcompressor.com/products/highly-rotary-compressor-bsa645cv-r1en.html

BSA645CV-R1EN

1. Refrigerant Gas: R134A
2. Capacity: 692W
3. Cooling capacity: 2359BTU/H
4. Voltage: 220-240V/50Hz/1PH
5. Application:
AC,drier,refrigeration,chiller,etc.

Product Description

Highly Rotary Compressor

Highly Rotary Compressor have high reliability proven in decades of market applications. They are designed with low sound and high adaptability to ambient temperature, as well as less space occupation in saving place and energy.

Highly Rotary Compressor will keep devoted to advanced technology and continuously provide highly reliable scroll compressors with a wide variety of power source and various applications of environment-friendly refrigerant.

Key Features

Wide range with wide application envelope suit varied applications.

Innovative IDV technology further enhances part-load efficiency with minimal redesign costs.

Bringing a new level of compressor robustness and system reliability.

Manifold configurations with high reliability for staged modulations.

Product Details

Model	BSA645CV-R1EN
Displacement	6.46ML/REV
Capacity	692W
	2359BTU/H

Refrigerant	R134A
Voltage	220-240V/50Hz/1PH
Cop	3W/W
Usage	AC,drier,refrigeration,chiller,etc
